## Welcome at garage.maemo.org!

This site is meant for hosting various software projects related to the maemo development platform.

If you have questions or looking for answers please check out [the FAQ page](#). If you would like to open a project then the best is to read the [Getting Started document](#).

**IMPORTANT:** Most projects hosted here are run by maemo community teams. [Official Nokia projects](#) are clearly identified as such.

### Latest News

#### [load-applet release v0.8.3](#)

*Eugene Antimirov - 2009-02-09 16:21* - [Load Applet](#)  
New feature - shutter sound after delayed screenshot.

It is for cases when you set 10 seconds, then go to fullscreen mode in your application to prepare desired view and then wait until it's probably done. I hope it will now be more clear when screenshot is ready :)

#### [Project started](#)

*Juha Kallioinen - 2009-02-09 09:18* - [Maemo on Beagleboard](#)  
Maemo on BeagleBoard project has been started up. The first release based on the maemo 5 pre-alpha2 SDK is available from the project's web site.

The goal of Maemo on BeagleBoard is to maintain a runnable environment based on the Maemo SDK for the BeagleBoard.

#### [BRisa UPnP Framework 0.8](#)

*Leandro Sales - 2009-02-05 13:00* - [BRisa UPnP Framework](#)  
I'm pleased to announce the release of Python-BRisa version 0.8. Python-BRisa is an UPnP framework written in Python with facilities for building UPnP devices, services and control points. Python-BRisa runs on the maemo platform, Linux and on Mac with a few tweaks. We would really appreciate community feedback, bug reports and feature requests concerning attempts to run it on other systems.
